## Review Questions A

1) Depreciation is the means to calculate the loss $n$ value of fixed assets.
2) Depreciation is calculated by using two methods :
(a) Straight line -
(i) Cost of the fixed asset less estimated Scrap/residual value/estimated useful Life of the fixed asset
(ii) Cost of the fixed asset x rate of Depreciation.
(b) Reducing - Net book value of fixed asset x rate of depreciation.
3) The recording of Double entry bookkeeping is the same for the two methods - debit Depreciation expense and credit Provision for depreciation of the fixed asset.
4) No, in the Profit and Loss account.
5) Depreciation expense in debited in the depreciation account and then transferred to the Profit and Loss account. The provision for depreciation account balance is transferred to the Balance Sheet and deducted from the Fixed asset.
6) 

Depreciation expense:
Building ( $10 \% \times 125000$ ) 12500
Fixtures and fittings ( $10 \% \times 42500$ ) 4250
Machinery $25 \%$ x (62 750-15 800) 11737.50

## Principles of A/Ccounts

Chapter 14

## Q1

- Direct debits -This is where you give the creditor the right to obtain the money straight from your bank account. This form of withdrawal is mainly used when there are different amounts to be paid each period (weekly, monthly, quarterly etc.)
- Standing orders -Here, you instruct the bank to deduct a fixed amount every period. Useful for insurance and mortgage payments.
- Overdraft interest -This will be deducted by the bank as a form of penalty for withdrawing more than you have in your account.
- Dishonoured cheque - This is a cheque which had been received from a customer and deposited but has been discovered to be invalid. A cheque becomes invalid for several reasons including insufficient funds, improper information placed on the cheque (e.g. wrong date, improper signature, words and figures for the amount

Q2

- Making deposits -This is shown by the word "deposit" in the statement.
- Direct credits - The opposite of a direct debit. Here you give the debtor the right to put money straight into your account. For example salaries deposits, or dividends from investments
- Interest earned - This is money that you have gained by holding cash in the bank.
